PROFESSIONAL GOAL

I like so much the programming. The development, for me, is not simply to write ordered lines of code: is the creation of one tool that helps to realize systematic tasks in a simpler way. Throughout the programming, and the skills that I have by my experience, I feel so much creative. I find my job, one place where I can build and feel satisfied by the created.

My skills, in broad strokes:

- Back-end development in PHP and Object Oriented Java Spring Framework.
- Design and use of MySQL and MongoDB databases.
- Front-end development in JavaScript, AngularJS and MongoDB.

Aptitudes:

- Communicative person with a very positive attitude for resolving incidents. The sincerity and the acceptance of responsibility always ahead.
- The productivity and the creativity are important aspects for me in the work. Through the nature of my work (the programming), I find that I can use that aptitudes with enthusiasm.
- I love to learn and to provide great value to my personal and work projects. Having a learning attitude brings me acquire new knowledge day to day, the thing that it fascinates me.
